Panel 5 - Intermediation in support of effective knowledge transfer – role of Catapults
What are Catapults and what do they do?

Catapults...
- Bridge the gap between research and industry
- Foster collaboration between organisations and sectors
- Get new ideas and technologies to market quicker
- Break down barriers to success
- Help SMEs get concepts to market
- Anchor innovation and jobs in the UK

They are...
- Expert
- Trusted
- Open access
- Independent
- Led by industry professionals

Address big issues...
- Systemic failures and complex, cross-sector challenges
- Short-term investment cycles
- Slow growth in productivity and competitiveness
- Wider adoption of enabling technologies such as artificial intelligence, biotechnology and robotics

Stimulate demand by...
- De-risking innovation
- Testing new ideas and technology in real-world scenarios
- Pump-priming new markets
- Sharing ideas across sectors
- Bringing large and small businesses together
  Making regulation fit for purpose
Catapults: where they are

Our network of Catapult centres is located throughout the UK in areas of strategic importance to each sector.

Regional Centres

- Satellite Applications
  - North East
  - Scotland
  - South West
  - South Coast
  - East Midlands

- Compound Semiconductor Applications
  - South Wales

- Digital
  - North East and Tees Valley
  - Yorkshire
  - Brighton
  - Northern Ireland

- Energy Systems
  - Birmingham

- High Value Manufacturing
  - AFRC - Strathclyde
  - NCC - Bristol
  - CPI - Wilton/Sedgefield/Darlington
  - AMRC and NAMRC - Rotherham
  - MTC - Ansty
  - WMG - Coventry

- Offshore Renewable Energy
  - Glasgow
  - Blyth
  - Levenmouth

- Future Cities
  - London

- Cell and Gene Therapy
  - Stevenage

- Transport Systems
  - Milton Keynes

- Digital
  - London
DRIVING THE UK ECONOMY THROUGH DIGITAL INNOVATION

@digicatapult • #wheredigitalinnovationlives • digicatapult.org.uk
Rapid digital innovation can disrupt businesses or lead to new growth and opportunity.

Digital Catapult believes in helping scale-ups and traditional businesses access the best academic research and digital innovation to transform existing businesses and create new ones.

“From R&D to production, from supply chain to point of delivery, we work with companies to capture the benefits of digital transformation.”

Dr Marko Balabanovic
CTO, Digital Catapult
Digital Catapult has centres in Brighton, North East & Tees Valley, Northern Ireland and Yorkshire in addition to its London headquarters. Each of the Catapult centres has a unique focus and is aligned with local digital innovation initiatives.
Digital Catapult works with SMEs and large corporates and collaborates with leading universities and researchers

SMEs
Priority is to help accelerate sustainable growth and development in digital innovations to make the UK economy stronger.

Larger corporates
Digital Catapult strengthens the culture of innovation and drives collaboration with the UK’s brightest digital innovators, industry experts and applied research.

Universities and researchers
Collaborations on R&D projects to accelerate the commercialisation of research and amplifying the impact to the economy.

"Doing the Pit Stop means our ideas have gone from conceptual to practical – we’ve been able to take steps towards developing solutions with partners.”

Julian Kirby
Director, PwC
Universities and researchers

- to provide industrial context back into research and development and increase the impact of research;
- to increase the speed and breadth of commercialisation of research.
- Broad base of engagement that feeds into higher impact activities

<table>
<thead>
<tr>
<th>People</th>
</tr>
</thead>
<tbody>
<tr>
<td>Researchers in Residence</td>
</tr>
<tr>
<td>• Increase the impact of the research</td>
</tr>
<tr>
<td>• Access to industry network and catapult expertise (technical, business development, commercial, etc.)</td>
</tr>
<tr>
<td>• All backgrounds – technical, law, sociology, business, arts, ...</td>
</tr>
<tr>
<td>Outcomes include: Publications, Development of new commercial and non commercial solutions, Proof of concept and more</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>

University Collaboration - examples
PETRAS stands for privacy, ethics, trust, reliability, acceptability, and security. They work with Digital Catapult’s IoTUK programme, sharing new and relevant knowledge with businesses and Government.

The PETRAS IoT Hub is led by UCL and includes Imperial College London, and the universities of Lancaster, Oxford, Warwick, Cardiff, Edinburgh, Southampton, and Surrey.
• £1.6M ESPRC funding + £1.3M Industrial funding

BBC, BT, Cambridge Wireless, CORSA, Dante, F5 Networks, Huawei, InterDigital, Keysight, Konica, NI, Ofcom, Thales, pureLiFi, Zeetta

• February 2017-January 2021

• Interconnects 4 of the leading UK research laboratories through the UK’s first SDN exchange

• Will establish a unique UK facility for fully end-to-end large-scale future internet experimentation

• Multi-technology 5G and beyond, IoT, optical transport, data centre and cloud

• Will enable innovation across all areas of networking:
  • Technologies, Architectures, Services, Applications,
SME engagement with Advanced (Experimental) Digital Infrastructure
